

### Ariel®—*the document delivery system for users of the Internet*

#### What's New in Release 3.01.

- Support for 24-bit color scanning and printing
- Support for 8-bit grayscale scanning and printing
- Support for TWAIN as well as ISIS drivers for scanners—see the complete list of Ariel-supported scanners below.
- Support for scanners that use either the USB or the SCSI interface
- Support for higher-resolution (up to 600 dpi) scanning
- Support for scanning and printing up to 11"x17" (ledger) or A3 paper—if supported by your scanner and printer
- Ability, while sending a document, to add an address to the address book "on the fly"
- Ability to add, delete, or replace a page or pages in a scanned document
- Ability to view thumbnails of all pages in a document
- Use of Windows Printing management for printing a single page or range of pages from a document
- Ability to send documents to patrons in PDF or TIFF format
- Ability to send documents in PDF or TIFF to a Web server and schedule their maintenance
- Ability to set the subject line for e-mailed documents
- Control of the patron database for document delivery to patrons with a link to RLG's ILL Manager patron database
- Support for firewalls by using Network Address Translation or by restricting the data port range
- Improved Log Viewer messages for tracking and diagnostics

#### RLG – Ariel Supported Printers.

We *strongly recommend* that you select a scanner from the "RLG-supported" list below. RLG has been able to test these makes and models and can provide full technical support for Ariel when used with them. We will do our best to answer questions about Ariel use with other scanners, but cannot provide full technical support.

## Product Information Sheet

**Versions 1.x to 2.2:** When selecting a scanner for use with these versions of Ariel, you will need one that has a SCSI interface and an ISIS driver.

**Version 3:** This version of Ariel also supports scanners that require TWAIN drivers and that use either the USB or SCSI interface.
